SUMMARY

Recent graduate with hands-on experience in AI/ML, data pipelines, and full-stack LLM applications. Proficient in Python, SQL, LangChain, and scikit-learn. Passionate about building impactful data-driven systems.

SKILLS

- Languages: Python, SQL, JavaScript
- Frameworks: LangChain, FastAPI, Flask, Streamlit, ReactJS
- ML/AI: scikit-learn, GPT-4, Llama 3, FAISS, RAG
- Tools: Pandas, NumPy, Git, Docker

EXPERIENCE

Data Analyst Intern — Example Company (Jan 2024 – Jun 2024)

- Automated reporting pipeline using Python and Pandas, reducing manual effort by 50%.
- Built interactive dashboards for executive-level KPI tracking.

PROJECTS

Agentic AI Document Intelligence

- Built a document Q&A system using GPT-4, LangChain, and FAISS for semantic search.

NL-to-SQL Chatbot

- Full-stack chatbot (FastAPI + ReactJS) converting natural language queries to SQL using Llama 3.

EDUCATION

B.Tech in [Your Branch] — [Your University] (2020 – 2024) | CGPA: X.X/10
